

what is it?

3G is a mobile Internet connection that works wherever there is cellphone reception. It gives you the freedom to move around and connect wherever you are, for business or pleasure. You can use it with your computer, netbook, laptop, iPad or smartphone.

purpose

Ideal for normal web browsing, emails, Internet banking and social networking while on the move

benefits

- Mobile
- No phone line needed
- Get connected in a few seconds
- No unsightly cables or wiring
- Works on your computer, laptop or cellphone
- Excellent network coverage in major metropolitan areas

speed

Your connection speed controls how quickly data gets to your computer over the Internet. 3G offers a high-speed Internet connection within the parameters of the modem or router you choose, with the added benefit of mobility.

data cap

Data cap refers to the amount of data you can transfer in a month.

Under 1 GB

This is ideal for intermittent checking of your email and basic web browsing.

Over 1 GB

Far more versatile for regular use such as accessing emails and web browsing.

Over 2 GB

Good for a small family researching school projects and social networking.

limitations

3G coverage and speed vary according to network availability and traffic.
