

Corporate Fax

Are you tired of “shadowing” your fax machine? Are you looking for a more efficient, cost-effective and environmentally friendly replacement for your outdated fax equipment? If so, then it’s time to switch to MWEB Business’s fax-to-email solution - Corporate Fax.

The new Corporate Fax facility is a digital fax solution that enables you to receive your faxes via email instead of a fax machine. Documents are transmitted electronically, directly to your inbox, in a way that is safe, secure, private and absolutely free.

A unique 0860 fax number will be linked to each user’s email address and sent directly to him or her, to start using immediately. No additional software or installation is required, and faxed documents are delivered directly to the customer’s inbox, in tiff or pdf format.

Corporate Fax ensures that faxed documents never go astray or end up on the wrong person’s desk. They remain confidential, stored in each recipient’s inbox. This enables you to save on ink, paper, fax machine repairs and upgrades, while continuing to receive faxes – free of charge – from almost anywhere in the world.

FEATURES AND BENEFITS

No additional hardware or software is required. All you need is a valid MWEB email address and your regular email programme.
