

Vodacom 3G / HSDPA

WHAT IS IT?

From R 130 p/m

As long as you are in an area that has cell phone coverage – you and your laptop will never be stuck without Internet access again! That's because 3G / HSDPA is technology that gives you an Internet connection that works wherever there is cell phone reception.

With 3G/HSDPA you get:

- Internet access at super-fast speeds.
- Total freedom. No need for a Telkom line which means that you're not tied down to any desks, cables, wall connections or Hotspots.
- Excellent [network coverage](#) in all major metropolitan areas in South Africa.
- Speed that is up to 40 times faster than Dial-Up Internet access.
- Instant connection - no waiting to dial up.

SPECIALS: SIGN UP FOR 3G / HSDPA

400 MB package

- R130.00 p/m for the 24 months.

WHAT DO I NEED?

- An MWEB Wireless Internet subscription.
- To be in an area that gets 3G coverage. If you're not sure contact our help centre.

If you're using a laptop you will need:

- A laptop running Windows 2000 (SP2 and above) or Windows XP recommended.
- Available Type II PC-card slot or USB port.
- 64 MB memory recommended.
- 100 MB minimum of free hard disk space.
- A 3G Data Card or a 3G USB Modem.

If you're using a desktop PC you will need:

- An external 3G router with PCMCIA card or 3G USB Modem.

VALUE ADDED SERVICES

Send faxes for free without a Fax machine

MWEB Faxmail

No more fax machines. No more paper and ink. Simply send and receive faxes from your e-mail with the click of a button. MWEB Faxmail is easy to use and it will help you save as much as 25% off most international faxes.

Keep you and your computer safe

AVG

MWEB has teamed up with the international security-software experts, AVG, to offer you complete protection for your computer in one simple, state-of-the art package: AVG . Keeping you safe from fraudsters, spammers, con artists and more.

Internet access using radio frequencies

Wi-Fi

You can also use Wi-Fi to connect to the Internet without the hassle of wires and cables. Wi-Fi is a local wireless network connection that makes use of high-frequency radio waves. This means that when you are in range of a Wi-Fi “hotspot” you can access this network (using your Wi-Fi-enabled laptop or at home with a Wi-Fi adapter connected to your desktop PC) and in turn access the Internet. You can set up your own Wi-Fi network in your own home or business or you can use it in any of the MWEB hotspots located in many restaurants, airport and coffee shops throughout South Africa.

GLOSSARY

- LAN: Local Area Network is a computer network that covers a small area, for example, a business.
- Modem: A device for connecting to an Internet Service Provider using a telephone line.
